EDUCATION

Texas A&M University – College Station, Texas

August 2023 – May 2027

Bachelor of Science in Computer Science

Cumulative GPA: 3.82

Coursework: Data Structures & Algorithms, Operating Systems, Computer Architecture, Computer & Network Security, Database Systems, Accessible Computing

- **Awards:** Dean's Honor Roll

SKILLS

Programming Languages: C++, Python, Java, SQL, HTML/CSS, JavaScript/TypeScript

Technologies/Frameworks: React, Node.js, Express, PyTorch, Playwright, PostgreSQL, MongoDB, REST APIs, AWS, Git

WORK EXPERIENCE

Software Developer Co-op | IBM

August 2026 – present

- Evaluate IBM's internal AI model, Bob, by benchmarking its performance across 1,000+ software engineering tasks
- Analyze environment generation frameworks to identify performance gaps and improve internal benchmark pipelines
- Execute benchmark tasks using internal frameworks to evaluate AI performance and reliability

Software Engineer Intern | ERCOT

June 2026 – August 2026

- Developed test automation for ERCOT's mission-critical power grid systems supporting over 27 million Texas customers
- Built a reusable upload/download utility for an internal test automation framework, eliminating duplicate code across teams
- Engineered and unit-tested automated access revocation, accelerating deactivation 10× and reducing compliance risk
- Applied prompt engineering with Claude, ChatGPT, and GitHub Copilot for development and debugging

Software Engineer Intern | Synexus Labs

November 2025 – January 2026

- Analyzed a 10k+ line React codebase and identified integration gaps for an AI-powered debugging tool
- Designed a scalable Python and Supabase backend integration workflow for a pre-launch C++ debugging tool
- Collaborated in an Agile team of six developers leveraging GitHub Projects for sprints, issue tracking, and code reviews

AI/ML Undergraduate Researcher | Texas A&M University

January 2025 – August 2025

- Built a domain-specific RAG chatbot using semantic search and embeddings from 50+ agricultural research papers
- Fine-tuned a BERT model in PyTorch on 1,000+ Q&A pairs, improving retrieval accuracy by ~30% over keyword search
- Built a software platform streamlining access to professional guidance for farmers, cutting decision-making time by 20%
- Co-authored an abstract accepted after formal review, helping secure institutional support for continued development

General Manager & Web Developer | River of Life SPA LLC

January 2022 – August 2024

- Designed and deployed a new responsive company website using React, increasing online visibility and website traffic by 20%
- Launched strategic digital marketing campaigns across Google Ads, Facebook Ads, and Groupon, generated \$100k in revenue
- Restructured employee scheduling, reducing staffing downtime by 15% while maintaining peak-hour coverage

PROJECTS

Sharetea Point of Sale | Java, React, PostgreSQL

October 2025 – December 2025

- Built a mock Sharetea point of sales GUI with Java Swing and integrated PostgreSQL with JDBC API
- Migrated GUI to a modern web application with accessibility enhancements leveraging React, Express, and Node.js
- Utilized Google OAuth, Translate, Cloud, and Weather APIs to improve accessibility for diverse users
- Collaborated with a team of four developers to build features using Agile/Scrum methodologies and GitHub Projects

Task Manager | Javascript, React, Node.js, Express, MongoDB

November 2025 – December 2025

- Developed a full-stack task management web application with a responsive, intuitive interface
- Implemented secure user authentication using JWT and hashed credentials, designed to protect 1,000+ active users
- Optimized MongoDB schemas and API queries, boosting CRUD performance by ~30%
- Conducted initial testing sessions with 10+ users and incorporated feedback to refine UI/UX and enhance workflow clarity
